

## *Recruiting Clinical Faculty*

The University Eye Center, the patient care facility of the SUNY College of Optometry, seeks to attract faculty committed to excellence in evidence-based patient care, who embrace innovation within a rapidly changing health care delivery system. The University Eye Center utilizes an academic health center paradigm, seeking to lead through innovative patient care, intellectual leadership through research and scholarship and the advancement of clinical education.

Recruiting and retaining high quality clinical faculty committed to providing an exceptional and innovative educational program within a dynamic patient care setting is a key strategic goal of the SUNY College of Optometry. While the predominant responsibilities include teaching in our patient care facility, the candidate is also expected to engage in teaching in the academic program, as well as research or other creative scholarly activities. Candidates should have excellent clinical and teaching skills as well as demonstrated leadership abilities and evidence of intellectual achievement.

Please see the reverse of this document for the specific positions that we are recruiting for.

## *We are a Great Place to Work*

### **Reasons You Should Consider Us:**

- SUNY College of Optometry is a fully accredited institution with an excellent reputation for the quality of its professional and graduate programs, its teaching and research faculty and its commitment to training the future leaders in optometric education, patient care and vision research.
- The College is committed to ongoing review and innovation in its clinical and academic organization in order to continuously enhance the quality of its programming and maintain its role as a national leader in education, patient care and research.
- With approximately 75,000 patient visits annually, the University Eye Center is one of the largest and most diverse academic health centers in the country, supporting a diverse patient population through an exceptional array of specialty services.
- The College is committed to the development of new knowledge. Through the Clinical Vision Research Center, the institution has a deep commitment to the expansion of clinical research at the college. The CVRC offers faculty a unique opportunity to engage and pursue funded clinical research.
- New faculty members can expect mentorship and support from established faculty and administrators.
- The College's students, in both the professional and graduate programs, rank among the best in the nation.

## *We are Located in the Middle of New York City*

The SUNY College of Optometry is located in an historic building in the middle of New York City, one of the most exciting cities in the world!

## *Faculty Position Pediatrics*

The SUNY College of Optometry is currently recruiting for a leadership clinical faculty position in Pediatrics. The position will consist of both clinical and academic responsibilities. Clinically, the candidate will be considered for the Assistant Chief/Section Chief of the Pediatrics section. The Pediatrics section is a component of the Primary Care Service of the University Eye Center (UEC), the clinical care facility of the College. Academic responsibilities include clinical and didactic teaching in the professional program, and an expectation of scholarship and participation in clinical research. The anticipated start date is July 2014.

The individual selected for the Assistant Chief/Section Chief of Pediatrics will work under the Chief of Primary Care to provide strategic leadership for the Pediatric unit, a focused clinical care unit of the UEC. The position will assure the highest standards of patient care and an excellence patient experience. The selected individual will take part in faculty development, service communication, schedule coordination and community outreach. Collaboration with other clinical services and the academic and research programs within the college is essential.

The SUNY College of Optometry, together with the University Eye Center, seeks to develop a vibrant intellectual community of clinicians, teachers and researchers who work together on educational and clinical research collaborations. The successful candidate will have a record of educational and scholarly activity in pediatric optometry and visual system development.

The successful applicant will be an OD with residency training in pediatrics or an MS or PhD, in a related area, with a desire to develop clinical and didactic teaching skills and scholarship. The position requires a Doctor of Optometry degree with full scope licensure in New York State. Salary is commensurate with education, training and experience.

Applicants should provide a CV, a statement of career goals and interests, any representative publications and the names and contact information of three references.
